Subject Commitment EICC membership

Dear EICC Board of Directors,

I am pleased to confirm that ASML supports the Code of Conduct as defined by the Electronic Industry Citizenship Coalition with respect to management systems related to Labor, Ethics, Health & Safety and Environment. We will actively pursue conformance to the Code in accordance with the standards as set forth in the Code. ASML will make a clear statement of this commitment to our stakeholders and the general public.

As a member of EICC we will work closely with our supply chain to further cascade the requirements of the EICC Code of Conduct and best practices to our suppliers, hence realizing Corporate Responsibility management practices and reducing risks by closely working with the EICC. Responsible supply chain management is an essential part of our business. It is our strategy to require our partners and suppliers to adopt the same norms and standards with regard to Corporate Responsibility as we apply to our own activities.

At the same time, we will challenge them to inspire us with new ideas. To this end we will utilize the EICC's tools and processes as a continuous improvement methodology in developing or implementing divergent efforts of our own.

On behalf of ASML and in support of our EICC membership, I am writing to state my company's firm commitment to supporting the EICC's mission, vision and goals.

Yours sincerely,

Jan Smits
Executive Vice President Strategic Sourcing and Procurement
